Office Action Summary	Application No. 09/905,703	Applicant(s) DERSHEM ET AL.	
	Examiner Laura B. Rosenberg	Art Unit 3616	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. This office action is in response to the amendment filed 12 December 2005, in which claims 15-31 and 33-40 were canceled, claim 41 was amended, and claims 42-52 were added.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 41, 42, and 45 are rejected under 35 U.S.C. 102(e) as being anticipated by Takemoto et al. (6,540,286). Takemoto et al. disclose a frame assembly (best seen in figure 1) comprising:

- Main frame assembly (for example, including #4-7, 16) having a base portion (for example, including #6, 7)
- First recessed channel (for example, defined by #10a, 11b) defined on the base portion, extending across a width of the base portion, and positioned to seat directly on a first crossmember (for example, including #3b) of an undercarriage (for example, including #1-3)

Art Unit: 3616

- Second recessed channel (for example, defined by #15) defined on the base portion, extending across a width of the base portion, and positioned to seat directly on a second crossmember (for example, including #3d) of the undercarriage
- First and second recessed channels are positioned between a front (for example, to the left in figure 1) and a rear (for example, to the right in figure 1) section of the main frame assembly
- First and second recessed channels define a strengthened region of the main frame assembly and are able to provide torsional stiffness (best seen in figure 1)

Takemoto et al. do not specifically disclose the frame assembly for use with a loader machine. However, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. Further, the frame assembly of Takemoto et al. is able to be used with a loader machine.

Allowable Subject Matter

4. Claims 50-52 are allowed.
5. Claims 43, 44, and 46-49 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments with respect to claims 41, 42, and 45 have been considered but are moot in view of the new ground(s) of rejection.
7. The examiner notes that a positive recitation of the loader machine in claim 41, for example claiming the loader machine comprising a specific frame assembly, as opposed to a frame assembly for a loader machine, might overcome the prior art of record.

Conclusion

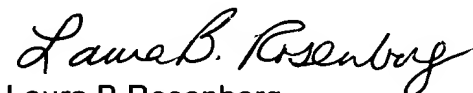

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fujii discloses a frame assembly including a recessed portion that is seated upon a cross member.
